

Australian Ethical is one of Australia's leading ethical fund managers. By investing responsibly in well-managed ethical companies, we deliver competitive financial performance to our clients and positive change to society and the environment. Since our inception in 1986, our Ethical Charter has guided all investment decisions and underpinned our business practices. Every year 10 per cent of our profits* are distributed to charitable organisations and social impact initiatives through The Australian Ethical Foundation.

Investment objective

To provide investors with a balance between capital growth and a moderate level of income through a diversified portfolio of assets that meet our Ethical Criteria. The Retail Fund aims to achieve returns 3.00% above inflation after management costs over a 10 year period. The Wholesale Fund aims to achieve returns 3.50% above inflation after management costs over a 10 year period.

Total returns are calculated using the sell (exit) price, net of management fees and gross of tax as if distributions of income have been reinvested at the actual distribution reinvestment price. The actual returns received by an investor will depend on the timing, buy and exit prices of individual transactions. Return of capital and the performance of your investment in the fund are not guaranteed. Past performance is not a reliable indicator of future performance. Figures showing a period of less than one year have not been adjusted to show an annual total return. Figures for periods of greater than one year are on a per annum compound basis. The current benchmark may not have been the benchmark over all periods shown in the above chart and tables. The calculation of the benchmark performance links the performance of previous benchmarks and the current benchmark over the relevant time periods.

Certification:

Why invest ethically?

Portfolio diversification: Diversify your portfolio by investing in companies and sectors not well covered by other fund managers and brokers.
Help build a better world: Invest in the new, low-carbon economy, fund medical and technology breakthroughs, efficient transport and more.
Promote human rights: We strive to avoid any investment in companies involved in the poor treatment of asylum seekers or the exploitation of workers through poor working conditions.

Commentary

Equity markets have continued their rally over the quarter, appearing to reflect expectations of a soft-landing outcome, with the MSCI World Index up 9.7% over the quarter. The strong equity market performance was seen across markets, where the S&P 500 was up 10.2%, MSCI Europe up 10.1% and Japan's TOPIX index up 17% over the 3-month period. The domestic ASX 200 index lagged, delivering 4%, though still strong by normal standards.

The Balanced Fund (Wholesale) (the 'Fund') rose 5.5% net of fees in the quarter ended 31 March 2024, outperforming its SAA weighted benchmark by 0.5%. The Balanced Fund (Retail) rose 5.3% net of fees in the quarter, also outperforming the benchmark.

There was positive performance across all asset classes in the portfolio over the quarter, with the exception of unlisted property. Our global equities portfolio led returns over the quarter, up 14.02%, while our domestic equities portfolio delivered 8.7%. Domestic yields remained relatively flat over the quarter, with the higher yield level delivering 1.04% over the quarter (4.2% annualized), while offshore the higher yield levels were offset by falling US bond prices as strong economic data pushed down the number of rate cuts expected from the Fed over 2024. Despite underperformance in our international equities portfolio, global equities were the largest driver of performance, while outperformance in our domestic equities portfolio drove the relative outperformance of the fund.
